

Hybrid Program

Pick your preferred school district in Canada

Students applying for our Canada Hybrid program can pick the school district they would like to live in during their exchange.

The Hybrid program provides students with an alternative option to the standard exchange program that allows you to select your school district. Please contact our office for a list of available school districts.

Preference for a specific school or town/city within the school district may be requested, however specific town/city placements within the school district cannot be guaranteed, as placement is based on host family availability and student/family personality matching.
